

2nd Vocational School of Katerini, Central Macedonia, Greece

13 October 2021 – Story board that – Padlet - Kahoot

Thanouri Glykeria

Project Nr. 2019-1-RO01-KA229-063217

«Together to improve our future»

C2 Short-term exchanges of groups of pupils

Storyboard That

- Storyboard That is a browser-based storyboard creator that can be used to tell a story, explain a process, show relationships, or show the passage of time. Students and teachers can choose from a variety of layouts, scene backgrounds, characters of all types, textables, and props. Their choices can be edited in many different ways to personalize their creation

Storyboard That

That is an easy drag-and-drop creation platform offering a free version and a premium subscription version with extensive abilities. The **Storyboard** Creator allows people of all skill levels to create amazing visuals for teaching, learning, and communicating.

You can watch the following **Storyboard That** tutorial video:

Padlet

- Padlet is a digital tool that can help teachers and students in class and beyond by offering a single place for a notice board. That's at its most basic.
- This digital notice board is able to feature images, links, videos, and documents, all collated on a "wall" that can be made public or private. This means that not only can teachers post on the wall but so too can students.

Padlet

- [Padlet](#) is a place where you can create a single or multiple walls that are able to house all the posts you want to share. From videos and images to documents and audio, it is literally a blank slate. It's collaborative, too, allowing you to involve students, other teachers and even parents and guardians.
- Who you share that with is up to you as a moderator. It can be public, open to all, or you can place a password on the wall. You can only allow invited members to use the wall, which is the ideal setup for education. Share the link and anyone invited can enter easily.

Padlet

- <https://padlet.com/>

Kahoot

A Kahoot quiz is a **series of questions with between two to four multiple-choice answers to choose from**. Teachers can create their own quizzes, duplicate and edit others created and shared by other teachers, or simply play Kahoots created by other users.

- What is Kahoot used for?

Kahoot! is a game-based learning platform that makes it easy to create, share and play learning games or trivia quizzes in minutes.

Kahoot

Can you play kahoot without an account?

Note that **students don't need accounts in order to play kahoots**. You can host a kahoot live to teach in class or remotely, or assign a student-paced challenge. When playing live in class, kahoots are displayed on a shared screen everyone in the classroom can see.

Thank you

Now let's play!!!
